It is to be noted by users of this *Index*

(1) that the items in I have received serial numbers, by which reference is made to them as a whole in III. A, when the entire article is in point;

(2) that the topics in III and the words in IV are a selection merely, including only those of most importance;

(3) that in some instances the articles deal with the language as a whole, and the separate words are therefore not listed in IV; but the article as a whole may be located under the name of the language in III. A;
